PROFESSIONAL SUMMARY

Senior Frontend / Full-Stack Developer with 12 years of experience building web applications across the full product lifecycle. Strong focus on React, TypeScript, Vue.js and modern frontend architecture, with hands-on backend experience in Node.js, NestJS and FastAPI. Experienced in enterprise platforms, reusable UI architecture, data-heavy interfaces, API integration, production deployment, and AI/LLM integration.

CORE SKILLS

Frontend: React, Next.js, Vue.js, Vite, TypeScript, JavaScript, Tailwind CSS, Mantine, AG Grid

Backend: Node.js, NestJS, Express.js, FastAPI, REST APIs, Socket.IO

Data & Architecture: PostgreSQL, MySQL, MongoDB, SQLite, Prisma, TypeORM, SQLAlchemy, Repository Pattern, Modular Architecture, SOLID

DevOps & Tools: Docker, Docker Compose, Linux, Nginx, IIS, GitHub Actions, Git, Playwright, Postman, Swagger/OpenAPI

AI / LLM: LLM APIs, RAG, Embeddings, Vector Search, AI Integration, AI-assisted Development

PROFESSIONAL EXPERIENCE

Neco Industry Management Company | Frontend Developer | 2020 - Present

- Own and develop the frontend of a large multi-module enterprise management platform.
- Proposed and led the Vue.js to React migration with Vite and modernized application structure.
- Designed Repository Pattern API architecture and a reusable Dynamic Form Generator.
- Built AG Grid server-side pagination, filtering, sorting, search, bulk actions and exports.
- Implemented workflow, Kanban, Program Designer, dynamic forms, localization and AI integration.
- Perform code reviews, mentor developers, and handle production deployment on IIS.

Risloo | Backend / Database Developer | 2023 - 2024

- Developed Node.js APIs and worked on database design, queries, integration and maintenance.

Orchid Pharmed / Bornafit Dr. Kaviani | Frontend Developer | 2019 - 2020

- Built and maintained Vue.js and Nuxt.js interfaces with API-driven application flows.

Majazeh Company | Web Designer / JavaScript Developer | 2018 - 2019

- Developed interactive web interfaces and JavaScript-based functionality.

Ermile Company | Web Development / IT Training | 2016 - 2018

- Worked on web development projects and delivered IT/web development training.

SELECTED PROJECTS

Neco - Enterprise Management Platform

Stack: React, TypeScript, Vite, Mantine, AG Grid, REST API, AI Integration

Enterprise project/process management platform. Frontend ownership includes migration to React, reusable form architecture, Repository Pattern, server-side data grids, workflow/Kanban, Program Designer, localization, AI integration, and production deployment.

Pomodoro - Productivity & Authentication Platform

Stack: Next.js, NestJS, PostgreSQL, TypeORM, JWT, OAuth, TOTP 2FA

End-to-end productivity application with secure httpOnly-cookie sessions, Google/GitHub OAuth, TOTP 2FA, persistent timer recovery, idempotent completion, tasks, analytics, bilingual UI, tests, migrations and Dockerized development.

Ketabdaneh - Full-Stack Management Platform

Stack: Next.js, FastAPI, PostgreSQL, SQLAlchemy, Redis, ARQ, Docker, Caddy

Full-stack modular platform designed and implemented end-to-end. Includes events, assignments, calendar, notifications, RBAC, background jobs, health checks, observability, backup/restore, CI/CD and bilingual RTL/LTR support. Production-oriented infrastructure is containerized.

AI Chat - LLM Chat Application

Stack: Next.js, React, TypeScript, Tailwind CSS, OpenRouter, Vercel AI SDK, Zustand

AI chat application with server-side API key handling, multi-turn context, streaming responses, persistent client state, stop generation, regenerate, and conversation/message management.

EDUCATION

MSc - Engineering Management | Islamic Azad University, Central Tehran

BSc - Industrial Engineering | Qom University of Technology

LANGUAGE

English: Professional working proficiency

ENGINEERING FOCUS

Product-oriented frontend engineering | Reusable architecture | Enterprise UI systems

Data-heavy applications | API integration | Authentication & authorization | Testing

Production deployment | AI/LLM integration
